Tan Phu District, Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Fullstack Developer with hands-on experience building AI-integrated pricing systems and enterprise web dashboards. Strong background in React, TypeScript, NodeJS, FastAPI, and Golang. Experienced in implementing role-based access control (RBAC), RESTful API integration, Docker-based development environments, and basic CI workflows. Seeking to deepen expertise in scalable web architecture and backend performance optimization.

TECHNICAL SKILLS

Front-End

1. ReactJS, NextJS, TypeScript
2. TailwindCSS, Bootstrap, SCSS
3. Axios, JWT
4. State Management (React Context API, Zustand)

Back-End

1. NodeJS (Express)
2. FastAPI
3. Golang (Gin, Clean Architecture)

Database

1. PostgreSQL (schema design, query optimization)
2. Redis (caching)
3. SQL Server

Core Concepts & Tools

1. Docker, Docker Compose, Postman for API testing
2. Git, GitHub Actions (basic CI)
3. OOP, RESTful API design

WORK EXPERIENCE

AIPOWER Co., Ltd - Web Developer

Aug 2025 - Feb 2026

1. Dynamic Pricing & E-commerce Solutions

Project Description: Built a suite of applications integrating three systems for dynamic pricing and e-commerce to optimize pricing and monitor market trends.

Applications Overview:

- Dynamic Pricer: AI system using machine learning to predict and adjust prices based on real-world factors.
- Price Crawler: Web application that collects and tracks product prices from Vietnamese e-commerce sites.
- User App: Web app for users to interact with pricing and crawling services.

Team Size: 3 (Main role: Full-stack developer for User App)

Responsibilities & Contributions:

- Developed the User Web Application using ReactJS and FastAPI.
- Implemented JWT-based authentication and user authorization.
- Designed and integrated APIs connecting the Dynamic Pricing ML service and the Price Crawler system.
- Configured Docker Compose for the local development environment.
- Integrated Redis caching to improve API response performance.
- Built dashboard interfaces displaying product lists and AI-generated pricing suggestions.

Tech Stack: ReactJS, FastAPI, PostgreSQL, Redis, Docker, Flask, Scikit-learn

2. S&OP Operation Dashboard

Project Description: Built a dashboard to support Sales & Operations Planning (S&OP), track and manage Risks & Opportunities (R&O) by cycle (monthly/quarterly), reflect impacts of S&OP factors, standardize workflows for data entry, submission, and approval based on department permissions.

Team Size: 2 (Main role: Frontend developer)

Responsibilities & Contributions:

- Developed the full frontend system using React, TypeScript, and Vite.
- Implemented Role-Based Access Control (RBAC) across modules.
- Integrated REST APIs from a Golang backend built with Clean Architecture.
- Designed KPI dashboards and cycle-based reporting views (monthly/quarterly).
- Implemented Excel import/export and PDF reporting features.
- Built Master Calendar and Risk & Opportunity management modules.

Tech Stack: ReactJS, TypeScript, TailwindCSS, Golang (Gin), PostgreSQL

EDUCATION

VNU-HCM University of Science - Bachelor of Information Technology

Aug 2023 - Apr 2026

GPA: 3.5/4.0

CERTIFICATIONS

1. TOEIC Listening - Reading: **810/990** (L: 450, R: 360)

Oct 2025

2. TOEIC Speaking - Writing: **280/400** (S: 120, W: 160)

Feb 2026
